The Hiring Team
Bitcoin Suisse AG

Grafenauweg 12
Zug, Switzerland

June 22, 2025

Dear Hiring Team,

As a Swiss citizen and experienced Software Engineer with over two decades of professional software development in mission-critical environments, I am excited to apply for the Software Engineer Trading position at Bitcoin Suisse. The opportunity to join a pioneering crypto-native company at the heart of Crypto Valley and contribute to the evolution of crypto trading systems is both inspiring and aligned with my recent learning and professional aspirations.

Over the past several years, I led initiatives at Schindler Elevators in Switzerland, working on embedded systems, diagnostics platforms, and automation tools using technologies such as C++, Python, PHP, REST APIs, and Linux-based systems. These projects demanded not only rigorous software engineering but also real-time problem-solving, field coordination, and agile delivery—skills directly translatable to your trading and brokerage systems.

In parallel, I developed a personal stock trading platform using **React.js** and **Flask**, designed to support value-based long-term investing as well as swing trades. This self-initiated project demonstrates my interest in financial systems and user-facing platforms, and complements my engineering background with hands-on experience in the investment domain. In addition please have a look at my github repo https://github.com/manojubhatia/dwf_assignment

While I haven't yet worked directly with .NET, C#, Azure, or the FIX protocol, I am actively expanding my toolkit and have completed self-study in agentic AI workflows, RAG architectures, and microservice development. My strong grasp of design patterns, SOLID principles, and integration of hybrid data pipelines has equipped me to rapidly learn new stacks and deliver enterprise-grade software with confidence.

Beyond technical expertise, I bring a pragmatic mindset, cross-functional collaboration skills, and a drive to build maintainable, clean code that aligns with business value. I appreciate your culture of autonomy and innovation and would be proud to contribute to Bitcoin Suisse's trading team.

I would welcome the opportunity to discuss how my skills and learning agility can support your mission. Thank you for considering my application.

Warm regards,

Manoj Bhatia
